

**What changes did you notice in the layout?**

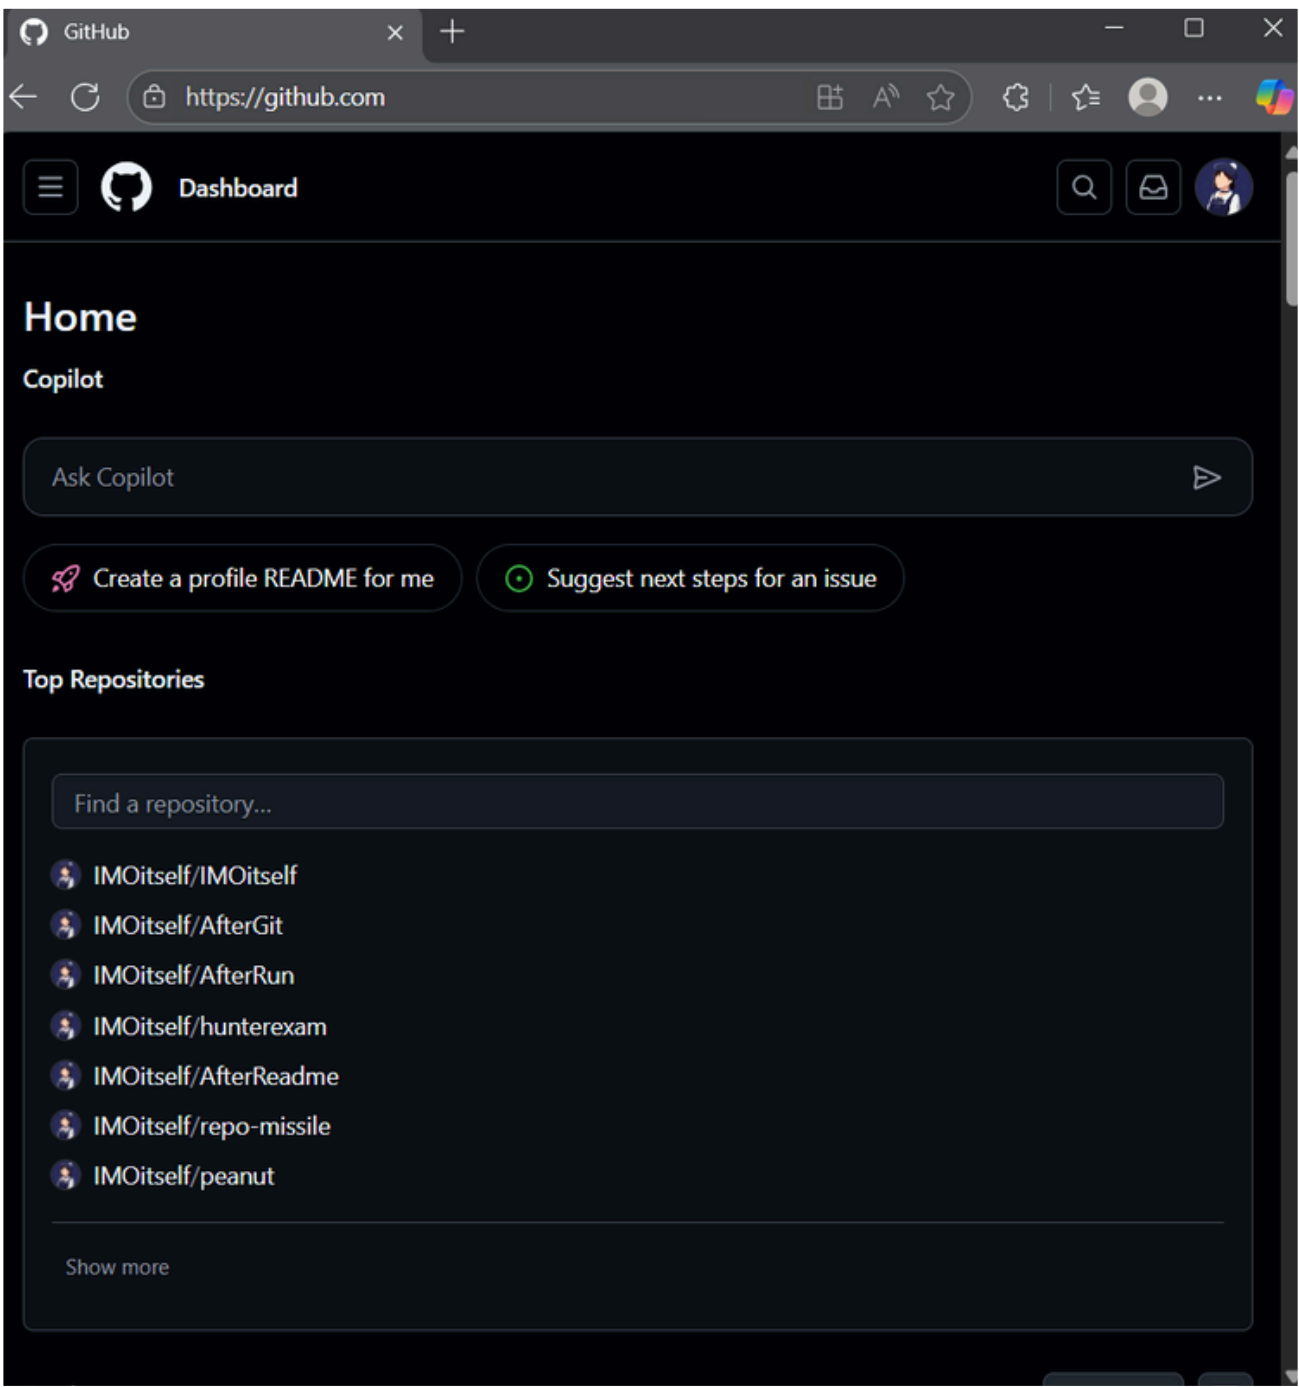

- some layout in the header got removed and the sidebar was moved to the main content

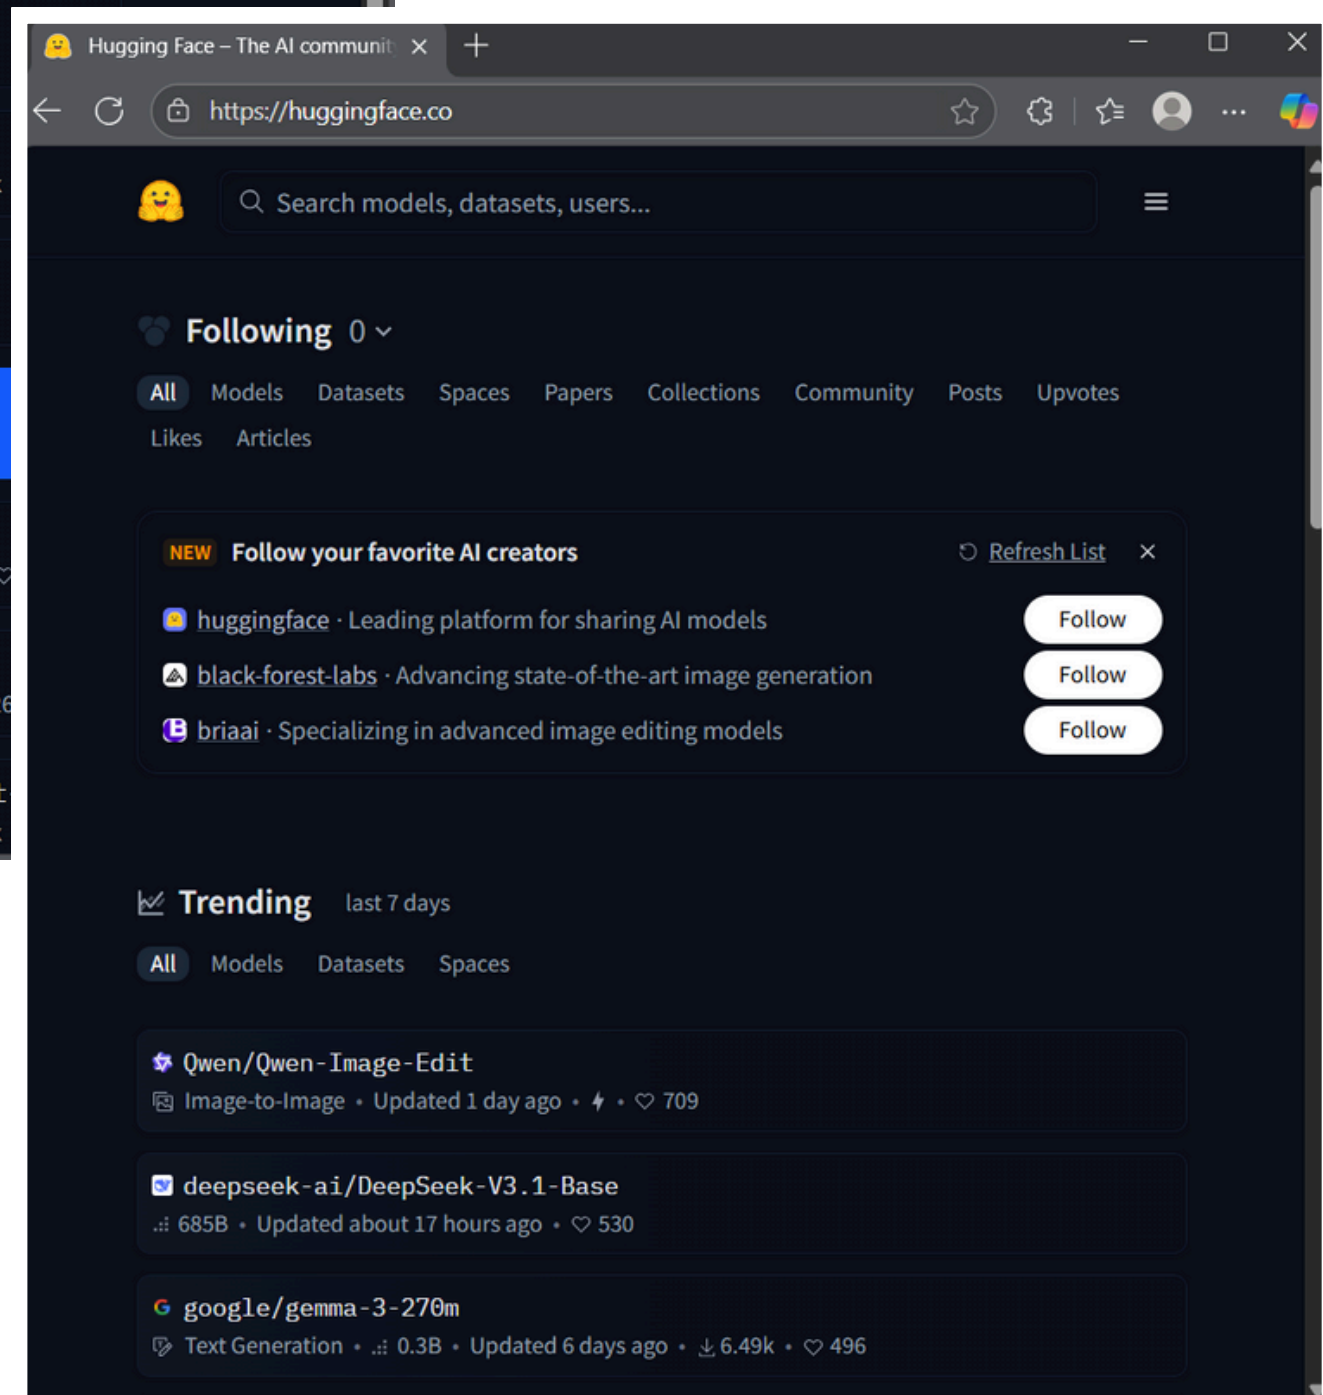

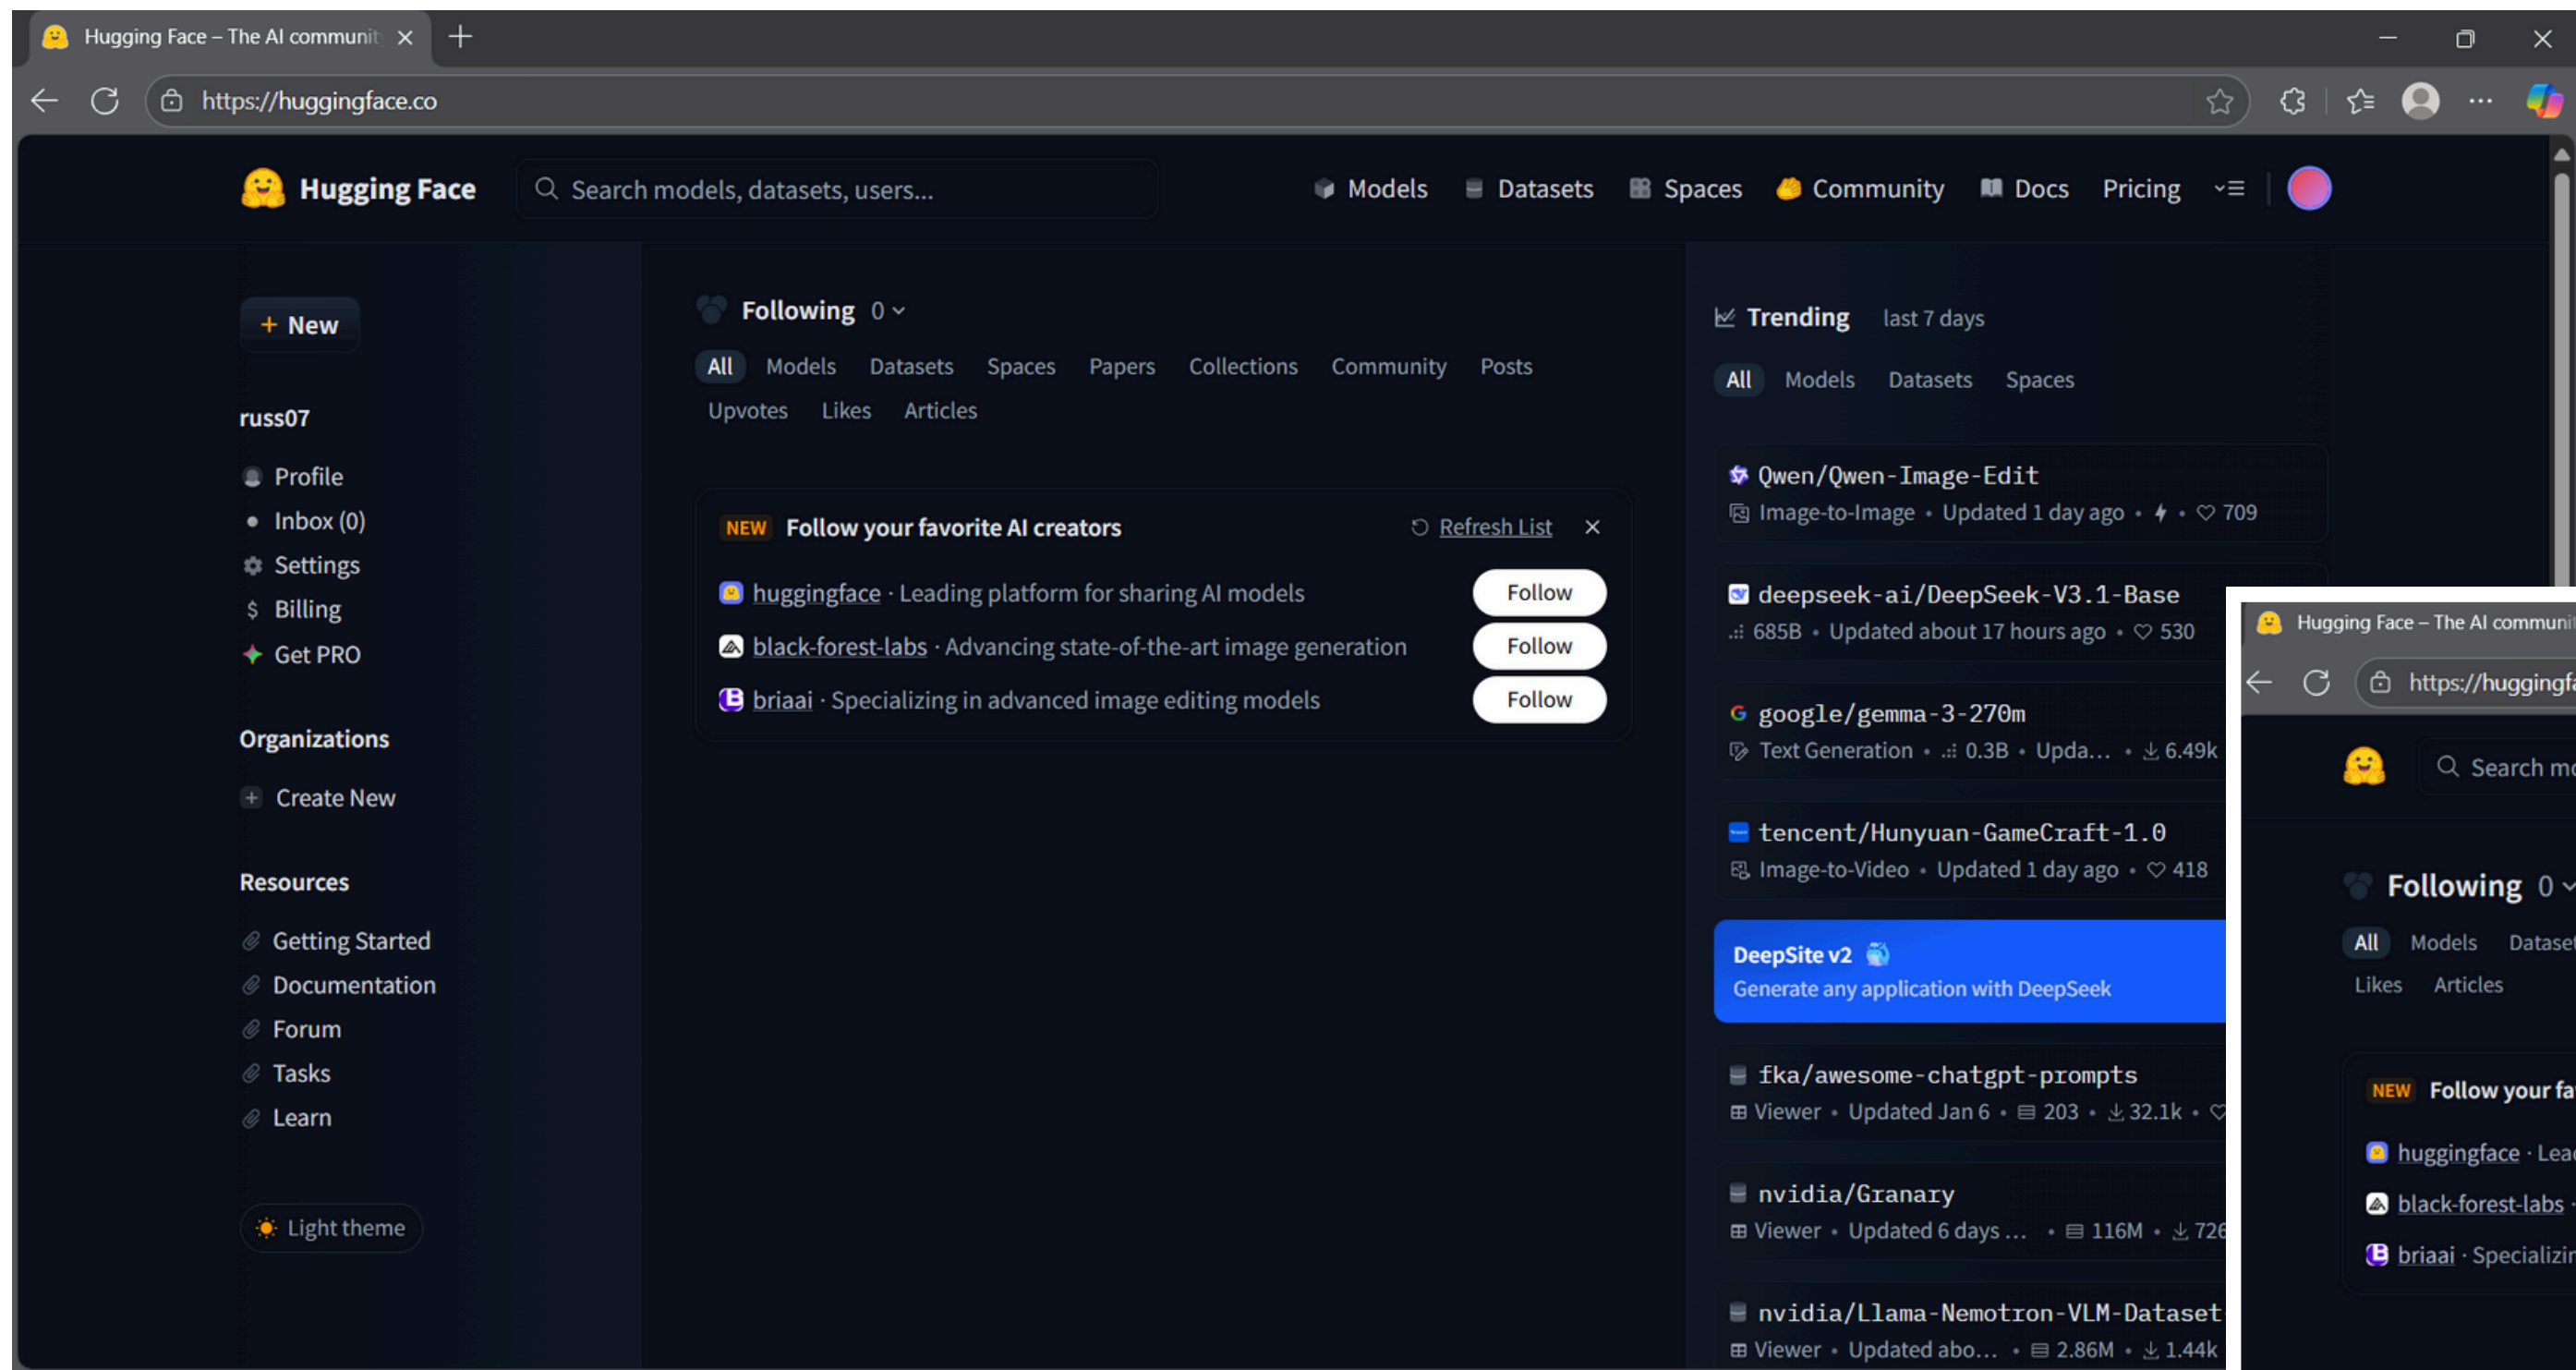

**Which parts remained the same?**

- the main content remains the same but with the sidebar moved into it

**How do these changes improve the user experience on smaller screens?**

- fewer elements makes it easier to navigate specially in a small screen, in my opinion.

## What changes did you notice in the layout?

- the navigation and side bar is gone and replaced with a hamburger menu. the trending section is merged into the main content

## Which parts remained the same?

- the main content and some header elements remains intact

## How do these changes improve the user experience on smaller screens?

- in a phone, most website prioritize scrolling than showing the user the full contents.
