NAVIGATION BAR

TIP #11. CHANGE THEM UP TO KEEP YOUR WEBSITES FRESH

Headers are incredibly flexible, and have a huge impact on how your sites appear. That's why changing website header layouts is a great way of keeping websites looking fresh, with minimal effort.

You don't need to **choose a new template** or alter the entire layout. Just change the header layout, make sure it looks great on all devices, and you've given your site a facelift, with minimal effort.
